## Summary

Hi, I am a passionate self-taught web developer, a full-timer husband who loves to code.

Eager to become Front End Expert and already made a few projects using react such as chat app, search engine web app, amazon clone, movie db, and so on.

I mostly do Html, CSS, and Javascript on a web app built using React while also take a look at the ui/ux. Solving a problem is something I seek and will do until nothing motivates me to touch the code.
